F FWallSim · Firewall Course

CLASS 19

The backup line never takes over

Troubleshooting: SD-WAN health checks

Advanced | ~15 minutes | FWallSim v1.0.0 (FortiOS 7.4 style)

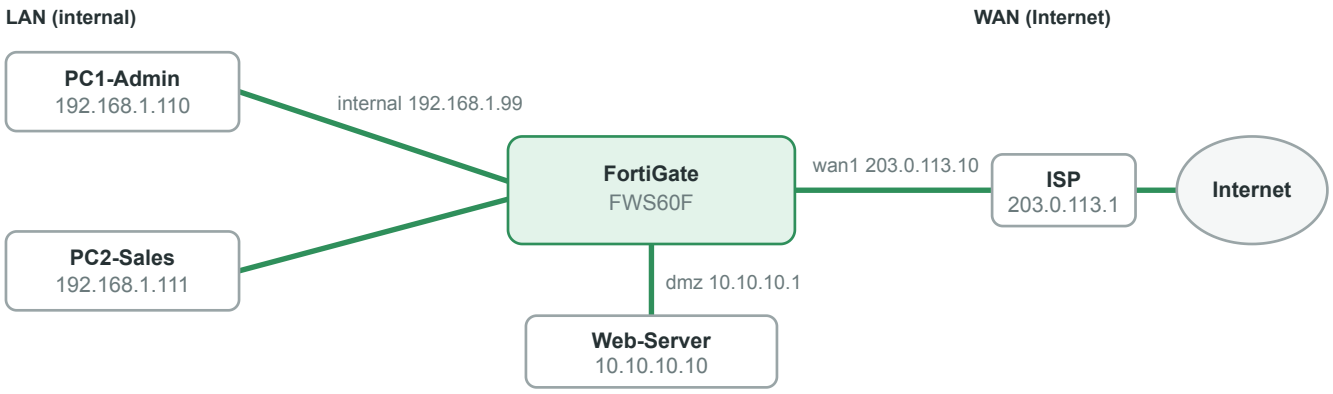

YOU WILL LEARN

- Troubleshooting: SD-WAN health checks

BEFORE YOU START

Finish Class 18 first.

The lab network

The goal

THE IDEA

SD-WAN is configured with two ISPs, yet during the current ISP1 outage the office is offline. Find out why SD-WAN keeps using wan1.

How to start

1. Open FWallSim and log in.
2. Click **Labs** in the header.
3. Find **The backup line never takes over** and click **Start**.
4. The Lab Guide panel opens. Each task below gets a green tick as soon as it works.

Tasks

1. **During the ISP1 outage, PC1 reaches 8.8.8.8**

   Keep the outage on (Lab > WAN) while you fix it.

Hints

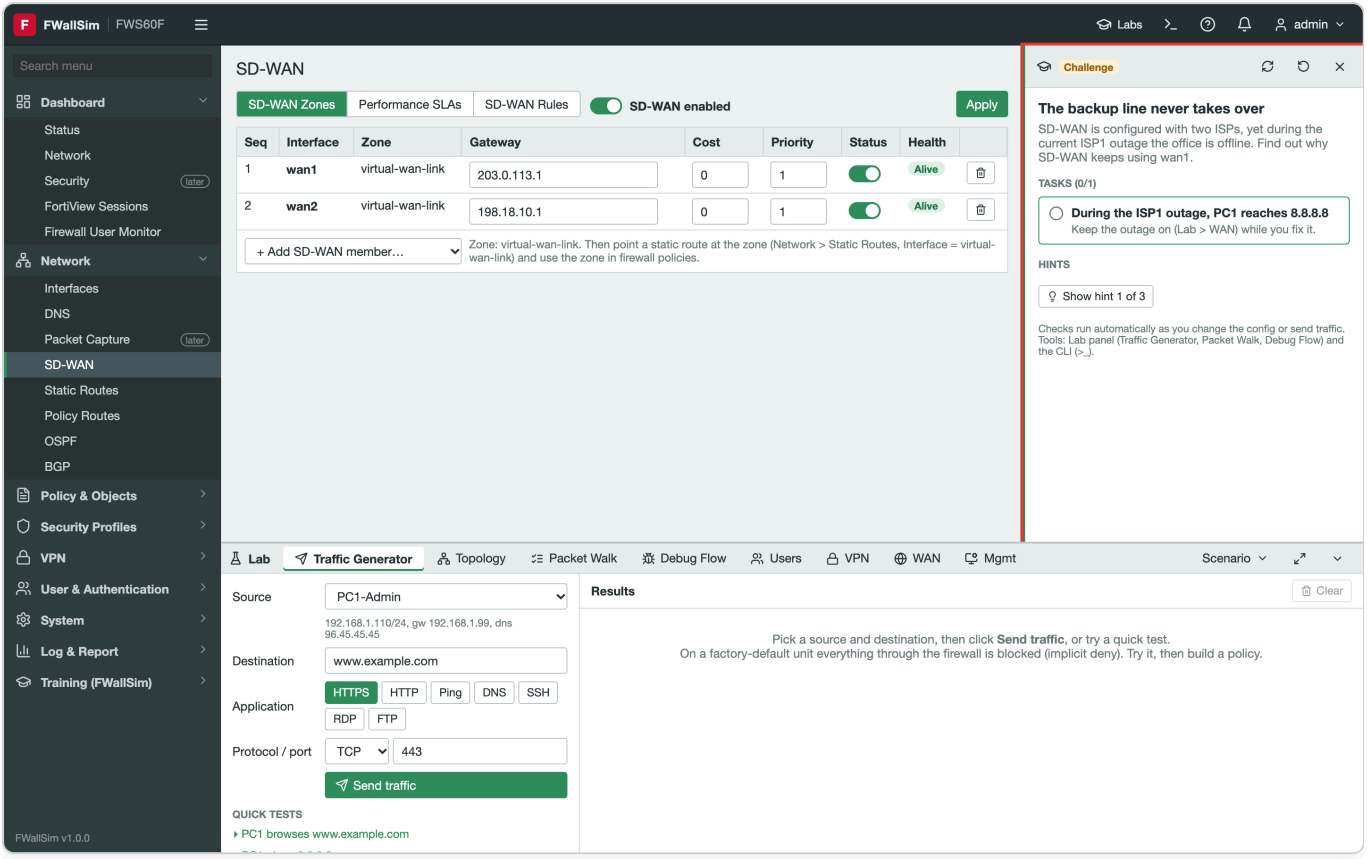

1. Network > SD-WAN > Performance SLAs: is wan1 alive or dead?
2. What server is the health check probing? Is it beyond the ISP?
3. Also check which members the health check probes.

Solution

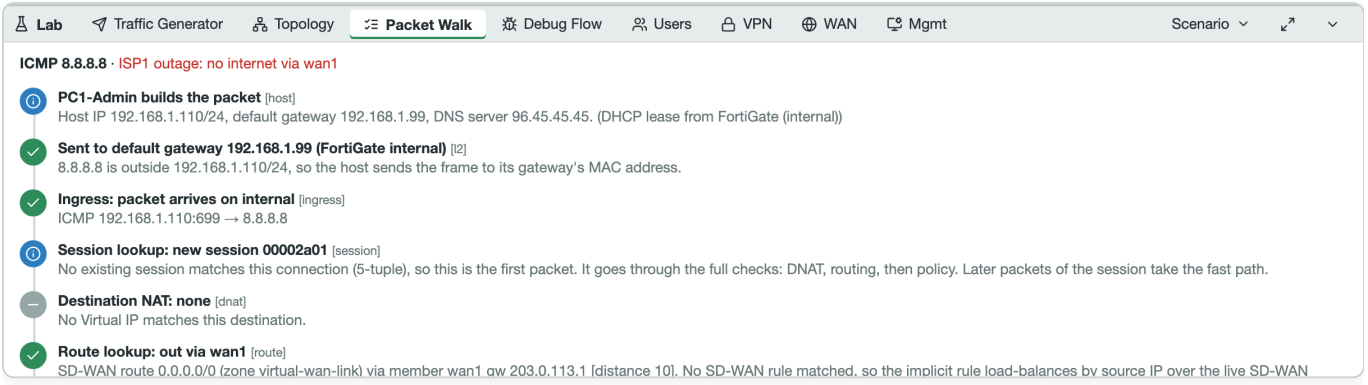

1. Performance SLAs: set the server to 8.8.8.8.
2. Make both wan1 and wan2 participants.
3. Apply, then test again.
