F FWallSim · Firewall Course

CLASS 6

Rule order matters

First-match policy lookup, policy order

Intermediate | ~15 minutes | FWallSim v1.1.0 (FortiOS 7.4 style)

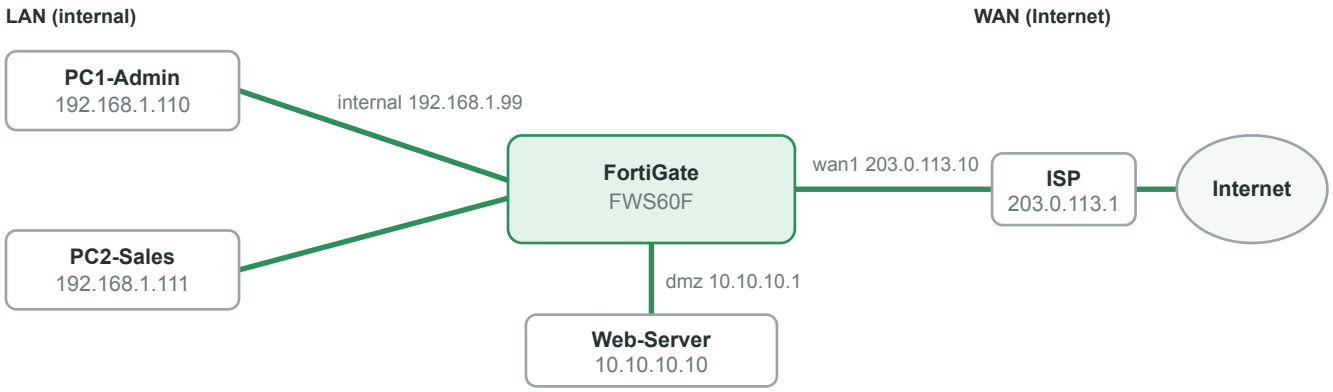

YOU WILL LEARN

- First-match policy lookup
- policy order

BEFORE YOU START

Finish Class 5 first.

The lab network

The goal

THE IDEA

Someone added a policy to block YouTube for PC2, but PC2 can still watch it. Find out why and fix it without breaking anyone else.

How to start

1. Open FWallSim and log in.
2. Click **Labs** in the header.
3. Find **Rule order matters** and click **Start**.
4. The Lab Guide panel opens. Each task below gets a green tick as soon as it works.

Tasks

1 PC2 can no longer reach YouTube (HTTP or HTTPS)

Policies are checked top to bottom and the first match wins. Use By Sequence view and drag the block policy above LAN-to-Internet (or right-click > Move up). Then test it in the Traffic Generator: send PC2-Sales → www.youtube.com twice, once HTTPS and once HTTP. Both must be blocked.

2 PC1 can still reach YouTube

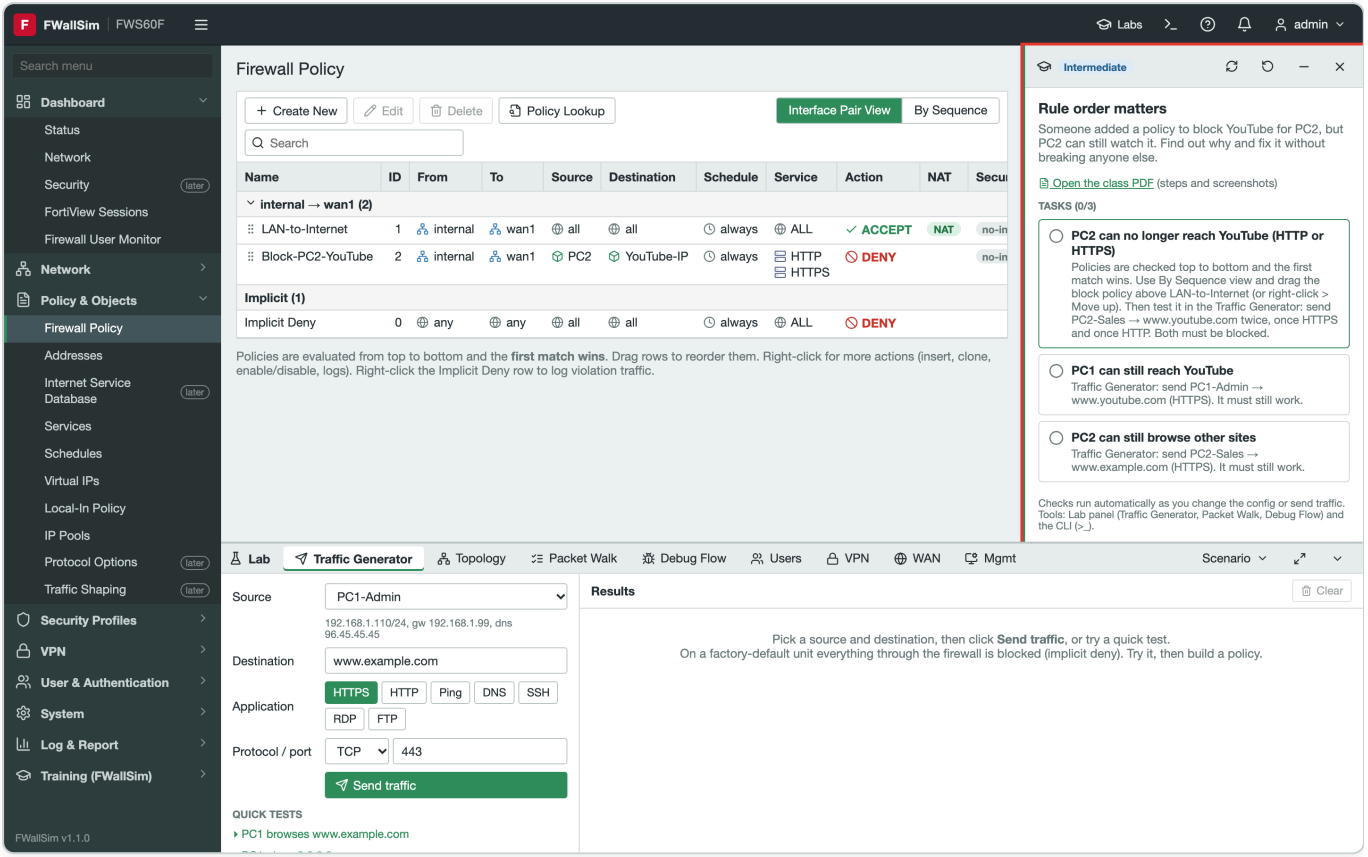

Traffic Generator: send PC1-Admin → www.youtube.com (HTTPS). It must still work.

3 PC2 can still browse other sites

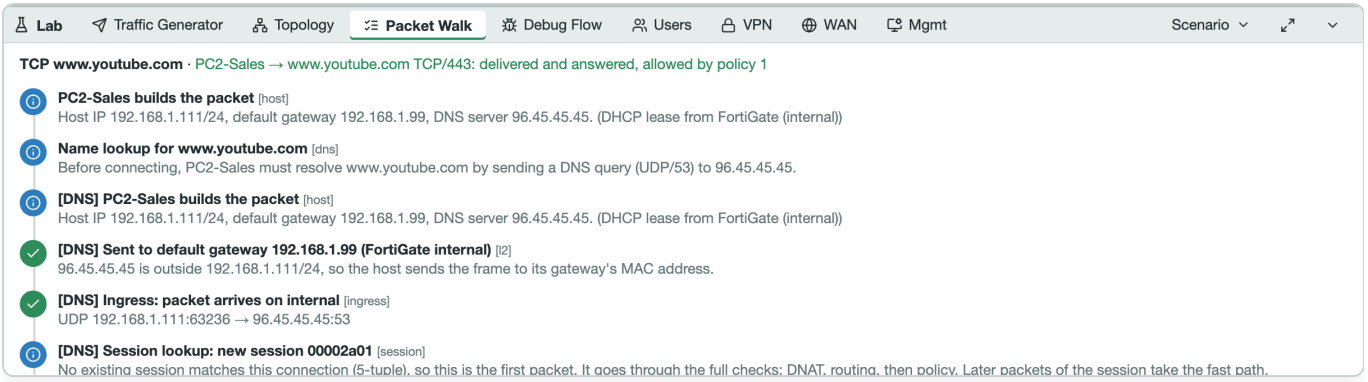

Traffic Generator: send PC2-Sales → www.example.com (HTTPS). It must still work.

Screenshots

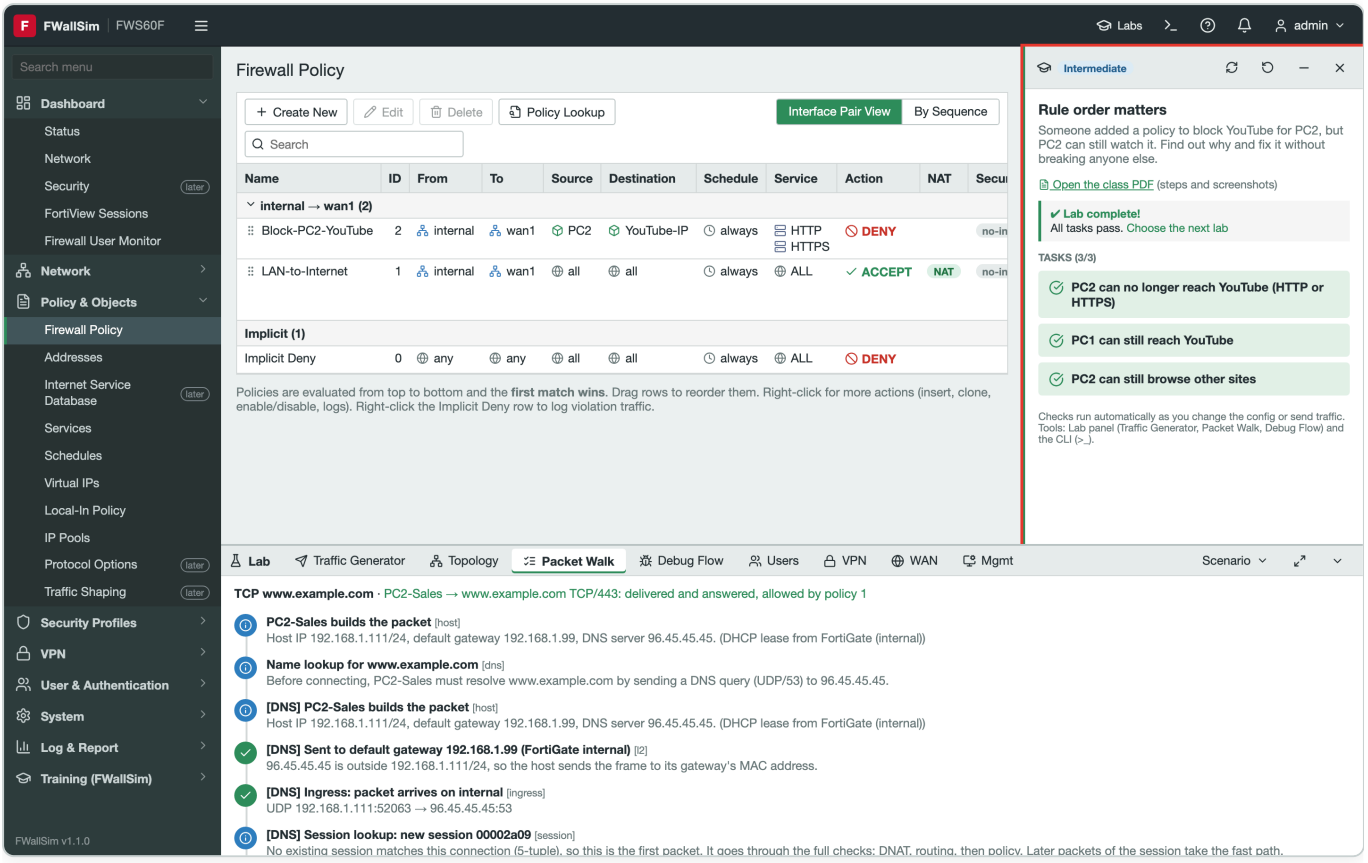

Numbered red markers show where to click or what to look at.
